

**ABSTRACT****COMPOSITIONS FOR TOPICAL APPLICATION COMPRISING GLUCOSYLATED  
HYDROXYSTILBENES, AND USES THEREOF**

The present invention concerns compositions suitable for topical application, comprising  
5 glucosylated hydroxystilbenes. It also concerns a method for slowly releasing hydroxystilbenes into  
the stratum corneum, by applying a composition comprising glucosylated hydroxystilbenes as a  
precursor. Finally, it concerns the use of glucosylated hydroxystilbenes to combat signs of  
cutaneous and hair follicle ageing, to improve the radiance of the skin, to smooth the skin of the  
face, to treat or prevent wrinkles and fine lines in the skin or to stimulate the epidermal renewal  
10 process.
